Professional Summary

Frontend lead with 7 years building and scaling high-traffic web products with React, Next.js, and TypeScript, and several years leading the teams behind them. Combines hands-on engineering depth - web performance and scalable frontend architecture - with team leadership across planning, code quality, and hiring. Amplifies team output with AI-assisted development, with a consistent focus on shipping quality work at scale.

Work Experience

Senior Frontend Engineer | adesso India | Aug 2026 - Present

- Building the frontend for Volkswagen Financial Services' banking application.

Lead Frontend Developer | SurveySparrow | Jun 2022 - Apr 2026

- Led, managed, and mentored a 4-person frontend web team; owned sprint planning, technical architecture, code reviews, and performance reviews.
- Developed custom features and admin workflows across CMS dashboards, building complex client-side SPA interfaces with rich interactive UI; built internal APIs and Server Actions.
- Drove frontend performance and Core Web Vitals optimisation - took every page from poor/needs improvement to good on a 1M+ monthly visitor website, with Lighthouse performance scores rising from 20-30 to 90-100.
- Architected and delivered a full migration of 3,000+ pages of surveysparrow.com from WordPress to React, Next.js, and Strapi CMS - leveraging Server Components, Streaming, and the App Router - including the project foundation.
- Built internal tooling including component libraries, a website starter kit, and 3 CMS plugins used org-wide by content teams, and shipped 3 new React product websites from scratch - sparrowcrm.com, sparrowgenie.com, and peopleinsales.com.
- Drove AI-assisted development practices across the team — using agents (e.g., automated code review), custom skills, and rules — to increase delivery velocity.
- Delivered several AI-powered features by integrating LLM APIs, including AI-based content workflows in the internal CMS.
- Implemented internationalisation (i18n) for a global multilingual audience, and built A/B testing infrastructure to power UX experimentation.
- Implemented app-level and CDN-level caching with cache revalidation strategies.
- Handled security, compliance, and observability: implemented cookie consent manager for GDPR, enforced CSP headers, resolved security findings from VAPT audits and integrated SonarQube workflow; set up analytics and monitoring tooling.
- Established team-wide coding standards, linting rules, style guides, and Git workflows; owned release management and CI pipelines (automated linting, testing, and security scans); maintained technical documentation for onboarding and knowledge sharing.
- Defined mobile app architecture for SparrowCRM product using React Native and Expo, laying the technical foundation ahead of its launch.
- Participated in company-wide recruitment: hired 10+ frontend engineers across multiple teams.

Senior Frontend Developer | SurveySparrow | Dec 2021 - Jun 2022

- Owned SurveySparrow's marketing website end-to-end, leading delivery and continuous improvement across design, performance, and SEO.
- Mentored junior frontend developers through regular code reviews and pair programming.
- Delivered pixel-perfect, performant, and accessible pages including animated and interactive UIs; stack: Vanilla JavaScript, SCSS, and Bootstrap.
- Built robust UI with proper error handling, loading states, and fallback experiences throughout the website.
- Integrated third-party tools including chat widgets and marketing platforms.
- Collaborated with marketing, design, sales, backend, DevOps, security, and legal teams to deliver high-quality, compliant web experiences.

Frontend Developer | SurveySparrow | Aug 2020 - Dec 2021

- Built pixel-perfect, performant, responsive, and cross-browser compatible pages and reusable UI components with strong focus on performance and accessibility.
- Developed HTML email templates with robust email client compatibility, including Outlook support.

Frontend Developer | Genius Group Global | Aug 2019 - Aug 2020

- Developed dynamic web interfaces; optimised page load performance.

Skills

Languages & Markup: HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, React Native, Expo

Styling: Tailwind CSS, SCSS, Radix UI, Bootstrap

State Management: Zustand, Redux Toolkit, Context API

Data Fetching: TanStack Query, SWR

CMS & Backend: Strapi, Payload CMS, WordPress

Testing: Vitest, Jest, Playwright

Tooling & Build: Webpack, Vite, Turbopack, ESLint, Biome, Storybook, Lerna (Monorepo)

Performance & SEO: Core Web Vitals, Lighthouse

AI: Claude Code, Cursor, MCPs

Education

B.Tech, Computer Science Engineering | Holy Grace Academy of Engineering, Mala, Kerala | 2019
